Benedictine and Brandy

www.airindiacollector.com

Hong Kong...one stop along Trans World Airlines around the world routes. Displayed on this cover is the magnificent harbor with two of the thousands of sampans and junks that fill the harbor. The crews of these ancient craft will be dressed in identical baggy pants and conical hats—as were their ancestors who handled these same vessels through the centuries.

Other fine color renderings suitable for framing of our Collector Series of "Great Cities of the World" will be presented periodically on various flight segments. A special envelope is also available if you wish to send this menu home as memento of your journey.
