

First Class and Executive Cabin
to London and India.

FIRST CLASS In India if there's one thing we believe in, it's opulence. You'll see it in our magnificent Taj, for instance, but you'll also find it in Air-India's First Class.

Everything we offer you is as lavish and beautiful as possible, from food carts laden with caviar, foie gras, lobster and pheasant to our food service, which includes crystal glasses and crisp damask table linens. And accompanying it all are vintage wines, French champagnes and the finest spirits from around the world.

Food, of course, isn't the only thing Air-India lavishes on you. We'll also give you

incredibly attentive service from the moment you arrive at our First Class check-in. On board, our First Class section has four flight attendants—one for each four passengers.

You'll also be surrounded by a sense of serenity and space. Our First Class cabin has only 16 seats, all of them Slumberettes so you can stretch out and sleep. And in the morning we'll awake you with a delicately scented hot towel, a set of Givenchy toiletries, a glass of cool juice and flaky croissants and coffee.

Air-India's First Class to London and India. It's almost too much.

Almost.

Stretch
your
imagination.

to London and India.

EXECUTIVE CABIN

Air-India's Executive Cabin is the perfect option for today's harried businessperson. Our Indian heritage makes us friendly, warm and attentive, and that makes the time you spend with us feel more like a refreshing little vacation than a transatlantic flight.

First off, our special check-in eliminates waiting in lines, and there's a special Executive Cabin lounge where you can relax and enjoy a cocktail before you board the plane.

On board we'll treat you to champagne and fine wines in crystal glasses. Your dinner will arrive on porcelain plates with damask table linens and includes hot hors d'oeuvres plus a choice of several delectable entrees.

But wonderful food is only half of it. Each passenger also receives reading materials of special interest to the business traveler, a sleeping mask, slippers, headsets for music or the movie and a toiletries kit for freshening up before you land.

Then there's all that room. Seats are wider and farther apart than ever before (with three full feet of leg room—more than any other transatlantic carrier.) And each seat is on a window or an aisle.

Air-India's Executive Cabin to London and India. You'll never get enough of it.
